

The Farmer and his Cow (Song)

A little bit of rain, some soil and sun,
Makes lush, long grass which contains calcium.
A cow chews on the grass and fills up her 4 bellies
Making milk and mooing at the farmer in his wellies.

Chorus

Clap hands - say wow!
Where would we be without the farmer and
his cow?
Clap hands - say moo!
Making lots of lovely milk and bringing it to you.
Farmer milks the cow, now milk is such a breeze, because we can
make it into 'udder' things like fromage frais and cheese.
All these things are good for growing teeth
and bones,
- on cereal, in sandwiches or even on
their own.

Chorus

Clap hands - say wow!
Where would we be without the farmer and
his cow?
Clap hands - say moo!
Making lots of lovely milk and bringing it to you.

(Repeat)

Clap hands, say 'cheese'!
Lots of lovely smiles - and lots of lovely teeth.
Clap hands, take a bow.
Where would we be without the farmer and
his cow?
